

PROJECT DESCRIPTION

Project Sponsor: Madison Middle School PTSA

Project Title: Electronic Reader Board Project

Project Site: Madison Middle School 3429 – 34th Avenue SW, Seattle, WA

Work:

The work consists of providing and installing a single-faced, 30 square foot electronic reader board sign with school name and logo panel plus three lines for text.

The sign is to be installed on the east building face of the gymnasium building, approximately 12'9" above the walkway.

The sign will require wireless remote operation, with capability and wiring dropped for laptop/PC control within main offices.

Electrical work to provide dedicated AC circuit to the exterior wall will be performed by separate subcontractor and managed by the Madison PTSA.

This project will require a Departure from City Design Standards, which will be managed and paid for by the PTSA. The selected sign company will need to provide drawings for use in the Departure process. The Departure process schedule can take six to nine months to complete, after which, if approved, a sign permit may be issued.

Attached to the Bid Form, please provide feature details for sign and related equipment included in the bid price.
